Hiring Manager

Circles.Life – Jetpac Team

Dear Hiring Manager,

I am excited to apply for the **Analytics Engineer Intern** role at Jetpac. As a recent graduate with strong skills in **SQL, Python (NumPy, Pandas), and data visualization tools** such as Google Sheets and Looker Studio, I am eager to contribute to Jetpac's data-driven initiatives.

Through my academic and project experience, I have developed the ability to write efficient SQL queries, perform exploratory data analysis, and communicate insights effectively to both technical and non-technical teams. I thrive in collaborative, fast-paced environments and am motivated to support Jetpac's mission of redefining global connectivity through innovative travel tech solutions.

Thank you for your consideration. I would welcome the opportunity to discuss how my skills can add value to the Jetpac team.

Sincerely,

Mahammadshoaib Mulla
